

WEB1100: Lecture 7

Web Development & HCI

Mohammad Tafiqur Rahman, Ph.D.
Associate Professor

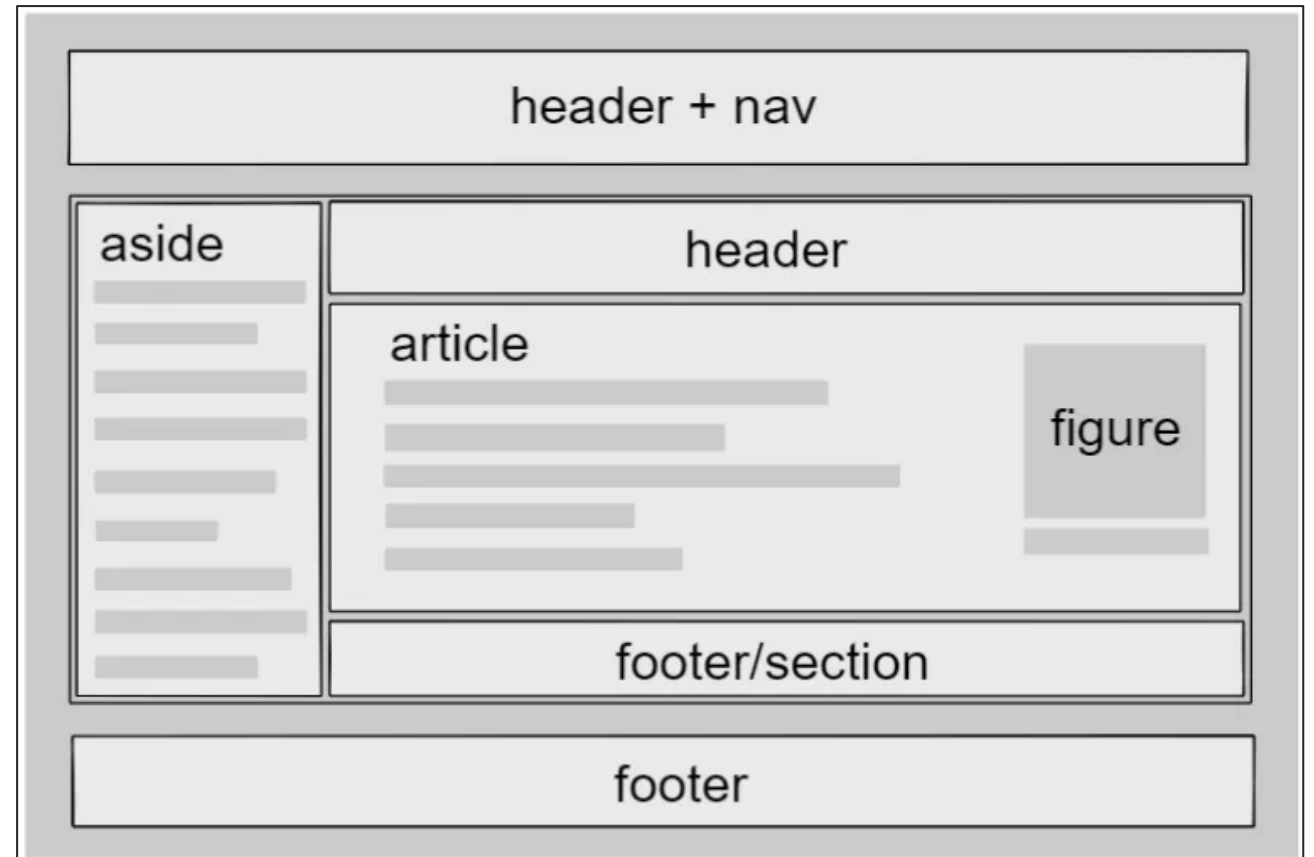

Agenda for today

- Cascading Style Sheets (CSS)
- Hypertext Markup Language (HTML)

HTML

Understanding semantic elements:

- `<header></header>`
- `<footer></footer>`
- `<nav></nav>`
- `<section></section>`
- `<article></article>`
- `<aside></aside>`

CSS

- Cascading Style Sheets
- defines style constructs/rules to fonts, colors, and positioning
- describes information formatting and display
- contains style rules
 - formatting instructions
 - contains style properties and values
 - apply styles to assigned web elements

CSS

Three main types styles:

- **Internal style sheet:**

- placed directly within a page
- suitable for single web page

- **External style sheet:**

- existed in a separate document
- has file extension .CSS and linked with special tag
- suitable for consistent look and feel maintaining multiple web pages

- **Inline style:**

- placed directly within a *tag* or *span*
- suitable for individual element
- specified in the middle of HTML code

CSS

Three ways to provide styles:

- External style sheet:

```
<head>
  <title>San Joaquin Valley Town Hall</title>
  <link rel="stylesheet" href="../../styles/main.css">
  <link rel="stylesheet" href="../../styles/speaker.css">
</head>
```

- Internal style sheet:

```
<style>
  body {
    font-family: Arial, Helvetica, sans-serif;
    font-size: 100%; }
  h1 { font-size: 250%; }
</style>
```

- Inline style:

```
<h1 style="font-size: 500%; color: red;">Valley Town Hall</h1>
```

CSS

Measures and colors specifications:

- Four common units of measures:

Symbol	Name	Type	Description
px	pixels	absolute	A pixel represents a single dot on a monitor. The number of dots per inch depends on the resolution of the monitor.
pt	points	absolute	A point is 1/72 of an inch.
em	ems	relative	One em is equal to the font size for the current font.
%	percent	relative	A percent specifies a value relative to the current value.

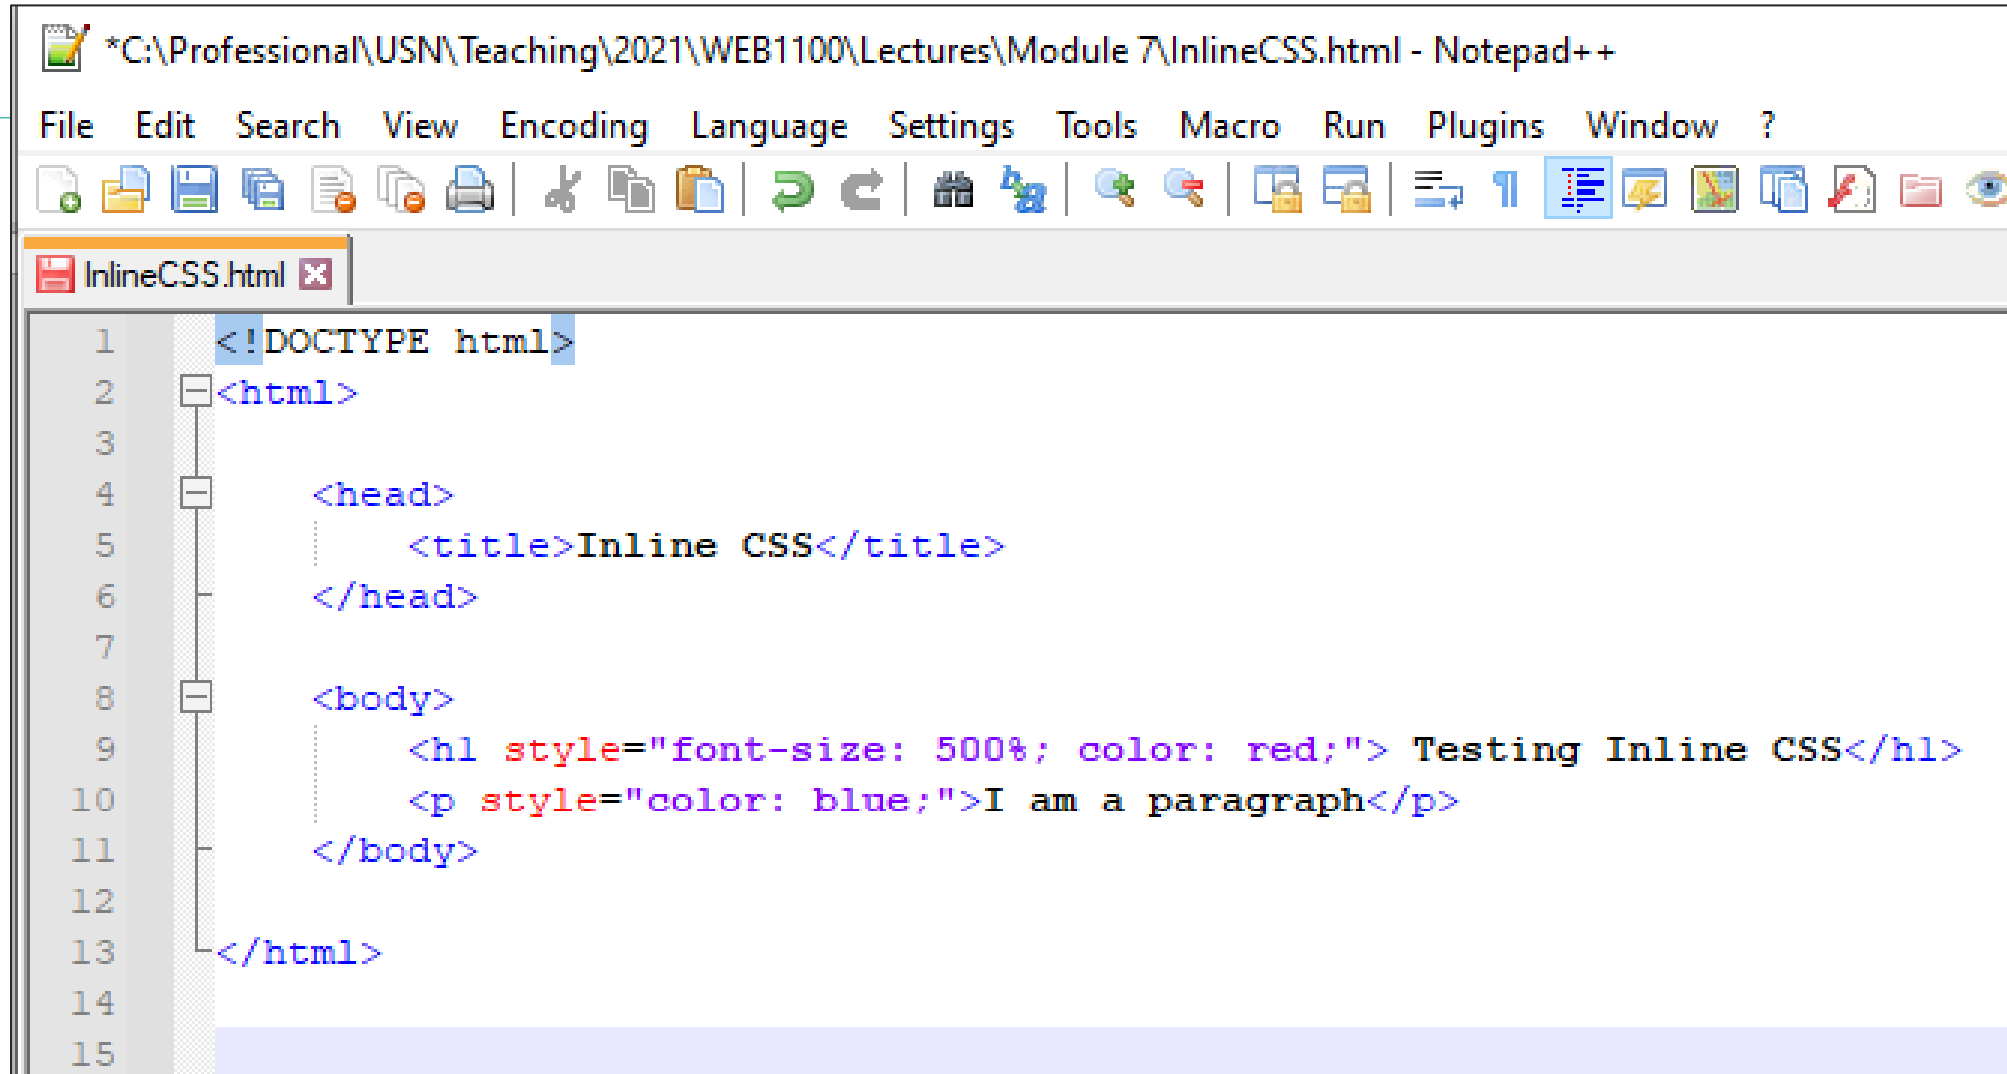

- 16 descriptive colors:

black	silver	white	aqua	gray	fuchsia
red	lime	green	maroon	blue	navy
yellow	olive	purple	teal		

```
color: #ffffff;  
color: #000000;  
color: #ff0000;
```

CSS

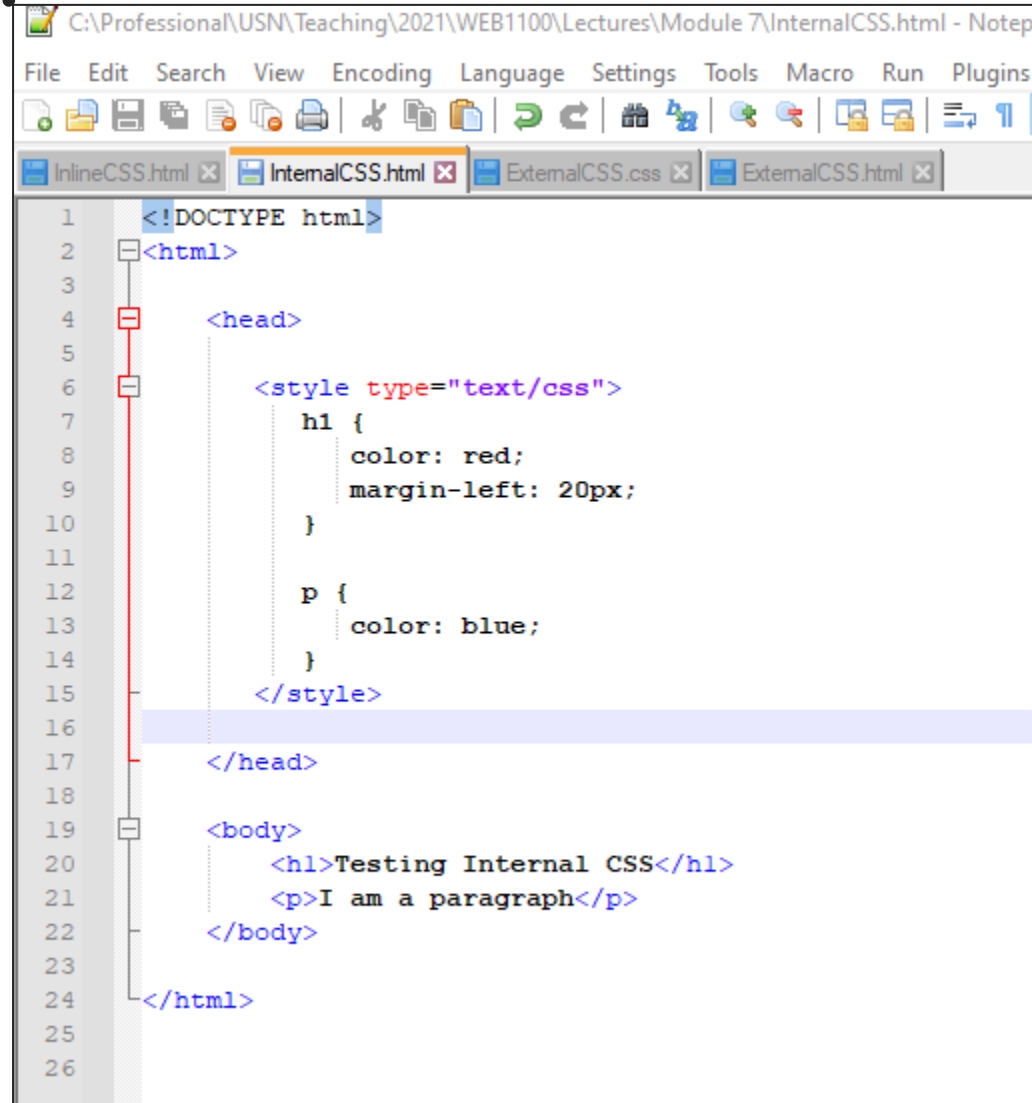

Inline style of CSS:

```
*C:\Professional\USN\Teaching\2021\WEB1100\Lectures\Module 7\InlineCSS.html - Notepad++
File Edit Search View Encoding Language Settings Tools Macro Run Plugins Window ?
InlineCSS.html x
1 <!DOCTYPE html>
2 <html>
3
4 <head>
5     <title>Inline CSS</title>
6 </head>
7
8 <body>
9     <h1 style="font-size: 500%; color: red;"> Testing Inline CSS</h1>
10    <p style="color: blue;">I am a paragraph</p>
11 </body>
12
13 </html>
14
15
```

CSS

Internal style sheet:

```
1 <!DOCTYPE html>
2 <html>
3
4 <head>
5
6 <style type="text/css">
7     h1 {
8         color: red;
9         margin-left: 20px;
10    }
11
12    p {
13        color: blue;
14    }
15 </style>
16
17 </head>
18
19 <body>
20     <h1>Testing Internal CSS</h1>
21     <p>I am a paragraph</p>
22 </body>
23
24 </html>
25
26
```

CSS

External style sheet:

```
1  h1 {  
2      color: red;  
3      margin-left: 50px;  
4  }  
5  
6  p {  
7      color: blue;  
8      font-weight: bold;  
9  }  
10
```

ExternalCSS.css

ExternalCSS.html

```
1  <!DOCTYPE html>  
2  <html>  
3  
4  <head>  
5      <title>External CSS</title>  
6      <link rel="stylesheet" href="C:\Professional\USN\Teaching\2021\WEB1100\Lectures\Module 7\ExternalCSS.css">  
7  </head>  
8  
9  <body>  
10     <h1>Testing External CSS</h1>  
11     <p>I am a paragraph</p>  
12 </body>  
13  
14 </html>
```

CSS

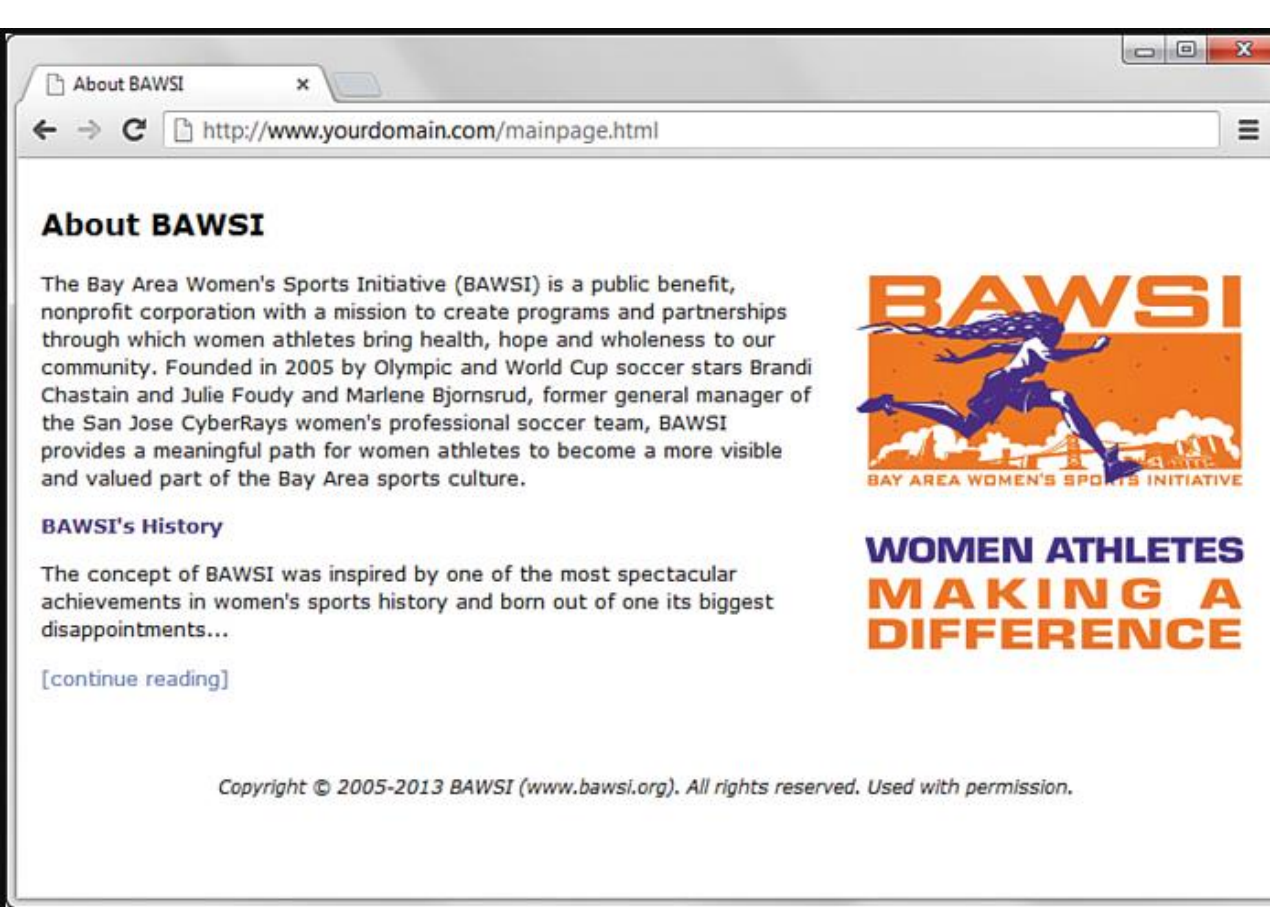

Cascade issue:

- the manner in which style sheet rules are applied
- more specific styles override more general styles
- follows a hierarchy of style rules

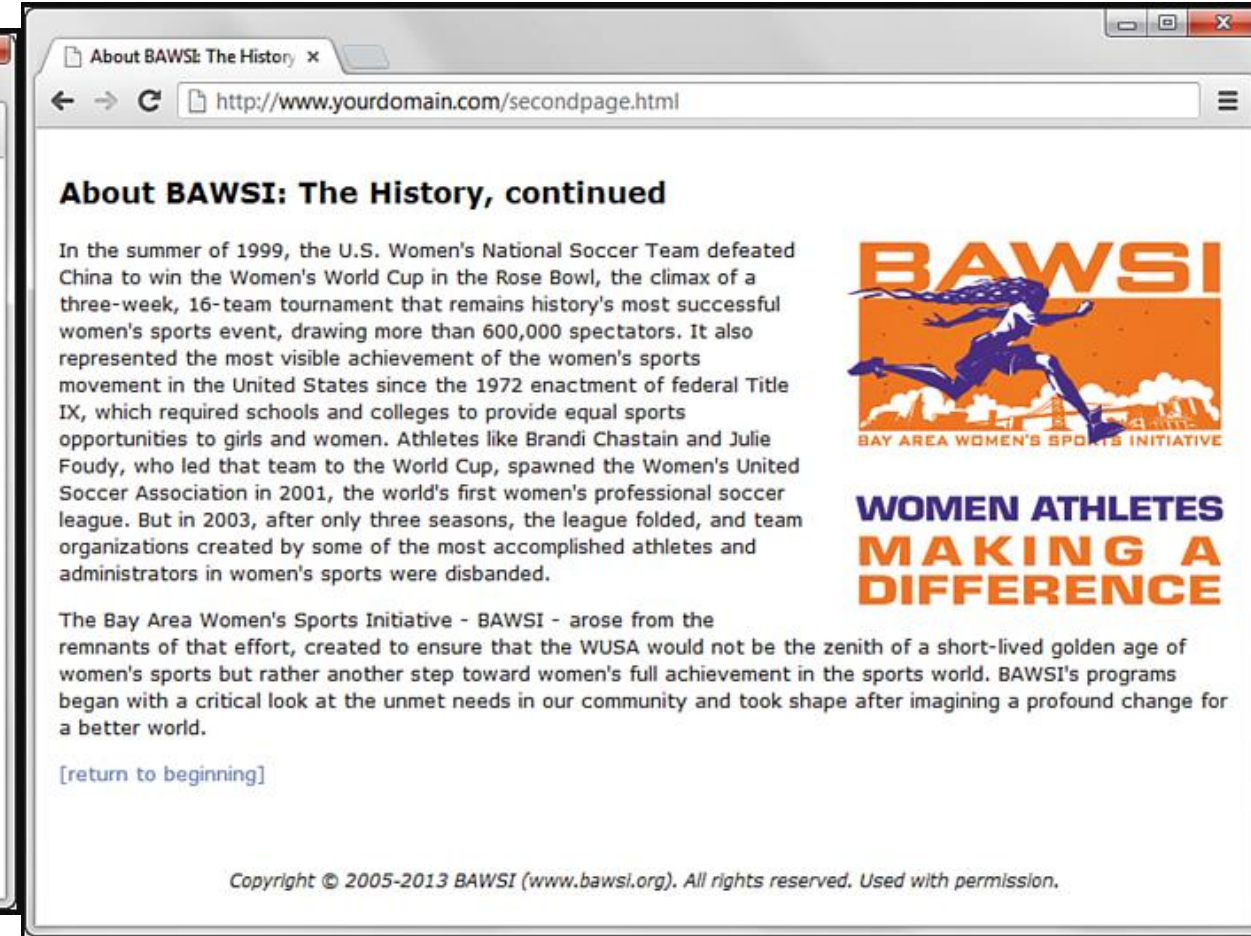

```
<div style="color:blue">
  <h2>Why We Do It</h2>
  <p style="color:green">
    We are paid an awful lot of money by people who like cheese. <br>
    <span style="color:pink">So we make more.</span>
  </p>
  <p>
    We are proud of our work.
  </p>
</div>
```

CSS

Example: BAWSI

About page

History page

CSS

Class Exercise: create an HTML document and apply CSS for the following outcome.

The screenshot shows a web browser window with the title 'Camembert Incorporated' and the URL 'C:/Professional/USN/Teaching/2021/WEB1100/Lectures/Module%207/exercise/HTML&CSS.html'. The website content is as follows:

- Header:** 'Camembert Incorporated' (purple, bold) and '"Many's the long night I dreamed of cheese -- toasted, mostly." -- Robert Louis Stevenson' (purple).
- Section 1:** 'What We Do' (purple, bold) and 'We make cheese. Lots of cheese; more than eight tons of cheese a year.' (red).
- Section 2:** 'Why We Do It' (blue, bold) and 'We are paid an awful lot of money by people who like cheese. So we make more.' (green) and 'We are proud of our work.' (blue).
- Footer:** 'Copyright 2021 Camembert.' (blue).

Annotations on the left side of the browser window:

- header-> color: #593d87
- div -> h2_color: purple
- p_color: red
- div_color: blue
- p_color: green
- span_color: pink

Annotations on the right side of the browser window:

- <-External CSS
- <-Internal CSS
- <-Inline CSS
- footer-> font-size:9pt
- line-height:12pt
- text-align: right
- <-External CSS

CSS

Specifications:

- Style rules for the footer and the initial section should be coming from an external file.
- Style rules for the middle section should be defined internally.
- Style rules for the final section should be defined inline.

Source code:

HTML&CSS.html

```
<!DOCTYPE html>
<html>
  <head>
    <title> Camembert Incorporated </title>
    <link rel="stylesheet" type="text/css" href="ExCSS.css"/>
    <style type="text/css">
      p.subheader{
        color: red;
      }
      h2.subheader{
        color: purple;
      }
    </style>
  </head>
  <body>
    <header>
      <h1>Camembert Incorporated</h1>
      <p>
        "Many's the long night I dreamed of cheese -- toasted, mostly."
        -- Robert Louis Stevenson
      </p>
    </header>
    <h2 class="subheader">What We Do</h2>
    <p class="subheader">
      We make cheese. Lots of cheese; more than eight tons of cheese
      a year.
    </p>
    <div style="color:blue">
      <h2>Why We Do It</h2>
      <p style="color:green">
        We are paid an awful lot of money by people who like cheese. <br>
        <span style="color:purple">So we make more.</span>
      </p>
      <p>
        We are proud of our work.
      </p>
    </div>
    <footer>
      Copyright 2021 Camembert.
    </footer>
  </body>
</html>
```

ExCSS.css

```
footer{
  font-size: 9pt;
  line-height: 12pt;
  text-align: right;
}

header{
  color: #593d87;
}
```
